Equality monitoring of employee protected characteristics

2023-24 data tables

Explanatory Notes

Publication principles
We present our data in a way that aims to balance transparency and our duty to protect the anonymity of our employees as per the General Data Protection Regulations (GDPR). The data we present:

- reflects the proportion of our workforce that has completed their equality data information, including 'prefer not to say' (but with non-complete records excluded)
- uses percentage bandings only, rather than the count of people in each group.

Recruitment Stage
There are two recruitment tables for each protected characteristic.

(1) shows the total applicant distribution by the following vacancy types:

- **Internal only:** vacancies that were open to current employees only
- **External and internal:** vacancies open to both employees and the public

(2) the progression of applicants by equality group through key recruitment stages:

This includes all applications received across all our vacancies in the reporting period. Where a person applies for multiple positions, they are counted multiple times. Using the example below, each column heading represents the last stage applicants reached. For example, 15-20% of total applicants reached the interview stage but were not appointed, whilst 15-20% were interviewed and appointed. The remaining 60-65% did not reach interview stage.

Sex	Applied/withdrew	Interviewed	Appointed	Total
Female	65-70%	15-20%	15-20%	**100%**
Male	60-65%	15-20%	15-20%	**100%**
Prefer not to say	100%	<5%	<5%	**100%**
Total	**60-65%**	**15-20%**	**15-20%**	**100%**

Trans status (gender reassignment)
We do gather transgender status data however our employee population is too small to publicly report on this protected characteristic.

National Identity
Monitoring questions and answer options are the same as those used in the Scottish Census 2011[1].

We use the following aggregated categories:

- **Scottish:** Scottish
- **Other British:** English, Welsh, Northern Irish, British
- **Other national identity:** Other national identity.

---

[1] We are aware there are updated Scotland census questions for 2022 but we have not yet updated our options. This applies to all references to using the Scotland 2011 Census questions.

Ethnic Origin

Monitoring questions and answer options are the same as those used in the Scottish Census 2011.

We have updated our aggregated categories for our 2021-22 reporting based on guidance published by the Scottish Government[2].

- **White Scottish, British, Irish**: aggregates white Scottish, British or Irish
- **White minority ethnic**: aggregates all other white ethnic groups
- **Non-white ethnic minority:** aggregates the high level Scottish census groupings mixed/multiple ethnic groups, Asian, African, Caribbean or Black and other ethnic groups.

We acknowledge that aggregating data in this way can disguise differences between ethnic groups. Our numbers are too low to disaggregate data further.

Religion or belief

Monitoring questions and answer options are the same as those used in the Scottish Census 2011. We use the following aggregated categories:

- **No religion or belief:** no religion
- **Christian:** aggregates Church of Scotland, Roman Catholic and any other Christian
- **Other religions or belief:** aggregates Buddhist, Hindu, Muslim, Sikh, Jewish, and any other religion or belief.

Disability

Monitoring questions and answer options are the same as those used in the Scottish Census 2011 and aligns with the Equality Act's definition of disability. Our reporting therefore includes disability and long term conditions.

Marital status

Monitoring questions and answer options are like those used in the Scottish Census 2011. We use the following aggregated categories:

- **Never married / never in civil partnership:** never married, never in a civil partnership; partner; single
- **Married / civil partnership:** married, in a civil partnership
- **Divorced / dissolved civil partnership:** divorced, dissolved civil partnership
- Separated
- **Widowed / surviving partner of civil partnership:** widowed, surviving partner of civil partnership

Care experience

Whilst not a protected characteristic, we are also including data concerning whether staff members have been in care. The answers to this question[3] are a simple 'yes', 'no', 'prefer not to say'.

Note: At present, we do not currently collect data on care experience status from job applicants; as such, the recruitment tables do not appear in this section of the document. We plan to begin collecting this data in future.

[3] 'Have you ever been in care?' - in care means you are or were formally looked after by a local authority, in the family home (with support from social services or a social worker) or elsewhere, for example, in foster care, residential care or kinship care (family friends or relatives).

Grades

Grade 1 is our lowest pay grade. Grade 10 is our highest pay grade.

Definition of full time

Our working week changed during the 2023-2024 financial year. From 1 December 2023, full time employees are those contracted to work 35 hours per week. Before 1 December 2023, full time employees were those contracted to work 37 hours per week or 36 hours per week for employees on legacy contracts.

Training

We provide disaggregated data by protected characteristic for the following types of training:

- **External qualifications:** courses run by external providers that result in a certificate or recognised qualification
- **Internal non-mandated training:** training our employees complete excluding mandatory training, such as corporate induction.

The training tables report individual instances of training: that means that where a single member of staff undertook multiple instances of training, they are counted multiple times. This is the same approach as we take for the recruitment data, as noted above.

Suppression of Values

All data tables use **percentages only**, not counts. The following principles apply:

- ➢ Percentages are reported in 5% bands. The Equality and Human Rights Commission guidance recommends to not report accurate percentages if the number of people is below 10.
- ➢ Where any figures are on the boundary between two bands, these have been allocated to the higher band, for example 65% would be within 65-70%, not 60-65%
- ➢ Upper and lower points are reported as <5% and >95%.
